BitPesa
Payments and transfers for Africa
Amy Ludlum, CFO
BitPesa
Payments and Transfers for Africa via the Blockchain
The Problem

Africa experiences some of the most expensive transfer corridors in the world

Sub-Saharan banks (ex SA) have slow, inconvenient services that don’t match consumer needs or their digital life

Ways to pay for international online goods are extremely limited, both in payment method and places of acceptance

Innovation is hampered by a lack of interoperability
The Solution?

Blockchain Technology

Cloud-based
Open-source
Double-crypto-key secure
Used by the most cutting-edge FinTech companies globally

Scaleable
Low-cost
Secure
Fundamentally Interoperable
BitPesa

First and largest company of its kind on the continent

Institutional investors and World Bank supported

Internationally experienced team living/working in East Africa

Using blockchain technology to scale rapidly and compete globally

Poised to corner market on alternative payout infrastructure in Africa
